

Senior Officer (IT) — Preliminary MCQ Master Bank

Bangladesh Bank / BSC • Job ID 25104 • 640 most-probable MCQs with answers & explanations (with 2018–2026 past-paper analysis)

How to use this MCQ bank

The **Preliminary (MCQ) test is 100 marks, 1 hour**, and only shortlists you for the written exam — but you must clear it first. Marks distribution:

Section	Questions × Marks	Marks
Bangla	10 × 1	10
English	10 × 1	10
Mathematics	10 × 1	10
General Knowledge	10 × 1	10
Subject Related (Computer / IT)	60 × 1	60
Total	100 × 1	100

 **Negative marking: –0.25 for every wrong answer** (and +1 for every correct one). This is the single most important rule.

Strategy to secure 80%+ (with negative marking)

- **The subject (IT) section = 60 marks.** If you get ~50 of 60 there, you are already at 50 — half the paper. This is your strongest area, so **master it first**. This bank puts **300 of its 500 questions on IT** for exactly that reason.
- **Do not guess blindly.** Because a wrong answer costs 0.25, random guessing hurts. Rule of thumb: if you can eliminate **2 of the 4 options**, guessing is worth it (50% chance to gain 1, lose 0.25). If you have **no idea**, leave it blank.
- **Answer what you know first**, then return to the 50/50 questions. Spend the least time on Bangla/English/GK you're unsure of.
- **Target split for 80 (=80 marks net):** IT ~50/60, Math ~7/10, English ~7/10, GK ~6/10, Bangla ~6/10 → ~76 raw, minus a little for wrong answers. Push IT to ~55 to comfortably clear 80.

How this bank is organised (640 MCQs)

- **Q1–Q300 — Computer & IT** (fundamentals, digital electronics, OS, DBMS, networking, security, programming, DSA, software engineering, cloud, abbreviations).
- **Q301–Q350 — Mathematics.**
- **Q351–Q400 — English.**
- **Q401–Q450 — Bangla.**

- **Q451–Q500 — General Knowledge** (Bangladesh, banking, international, science — with 2026 current affairs).
- **Q501–Q640 — High-Frequency Repeat Questions (Part 6)** — 140 questions modelled on **actual past papers (2018–2026)**, including genuine repeaters that have appeared across multiple years.

Every question shows the **answer in-line with a one-line explanation**, so you learn *why*, not just *what*.

Past-paper research behind this bank

This edition was built after analysing real solved papers, including the **Combined 4 Bank Senior Officer (IT/ICT) 2018** (80 questions — the closest match to your IT post, heavy on OOP/C++/Java, number systems, logic gates, DBMS, networking) and the **Combined 10 Bank Senior Officer 2023** (100 questions — the current Bangla/English/Math/GK style), plus 2026 current-affairs sources. Part 6 captures the questions and question-types that recur most often, so focus your final revision there.

Part 6 — High-Frequency Repeat Questions (2018–2026 pattern analysis)

Why this section exists. These 140 questions are modelled directly on **actual past BSC / Combined-Bank IT & Senior-Officer papers (2018–2026)**. Several of them have appeared *more than once across years* — for example, the Bangla কারক question “সারারাত বৃষ্টি হয়েছে” (— অধিকরণে শূন্য) appeared in **both** the 2018 IT/ICT paper and the 2023 Senior Officer paper. Master this section last — it is your highest-return revision.

Pattern summary (what repeats):

- **IT subject (heaviest):** OOP theory (polymorphism, inheritance, overriding, constructor overloading), C++/Java specifics (destructor ~, scope-resolution ::, interfaces for multiple inheritance, JDK/JVM/JRE), number-system conversion & bitwise operations, logic gates (XNOR = equivalence), DBMS terms (tuple = row, primary key), networking (NAT, OSI 7), DSA (binary search $O(\log n)$, recursion — stack), cloud computing, and IT abbreviations/terms.
- **Bangla:** কারক-বিভক্তি, বাগধারা, ব্যাসবাক্য, সন্ধিবিচ্ছেদ, শুদ্ধ বানান, বিপরীত/সমার্থক শব্দ, উপসর্গ/অনুসর্গ, শব্দের উৎস, লেখক-গ্রন্থ, ছদ্মনাম.
- **English:** idiom/phrase meaning, one-word substitution, correct spelling, active—passive voice, sentence-error spotting, fixed prepositions.
- **Math:** interest (SI vs CI), profit-loss, ratio & LCM, percentage, probability, Venn/sets, mensuration, train-speed, geometry.
- **GK:** Bangladesh + banking + world current affairs (heavily current-events based) and static facts (UN 1974, UNESCO-Paris, horsepower 746 W).

Final MCQ exam-day strategy (read this the night before)

1. **Negative marking is real (–0.25).** Answer confidently what you know; guess only when you can eliminate at least two options; leave true blanks empty.

2. **Bank your subject marks first.** Attempt all 60 IT questions before touching Bangla/English/GK — that is where your 80% lives.
3. **Watch the clock.** 100 questions in 60 minutes $\approx$ 36 seconds each. Do the easy ones fast, mark the hard ones, and return.
4. **Fill the OMR carefully** — one shifted bubble ruins the rest. Recheck every 10 questions.
5. **Current affairs may move.** Re-verify the Governor, PM, and any headline events the day before, since these can change.

Best of luck — clear the prelims, then the written guide will carry you through. You can do this.
